

AIRBORNE PRINTER PAPER

**AstroNova® Brand
Airborne Printer paper**

AstroNova® brand Airborne Printer Paper produces crisp, high contrast images that last for seven years. Not only does our paper extend the life of thermal printheads, but the high quality of our product improves reliability, resulting in fewer printer failures and misinterpretations. We stock and ship our top-quality paper directly to you from our factory warehouse, ensuring you have what you need from take-off to touchdown.

Airborne Printer Paper

TOP 5 BENEFITS OF BUYING AIRBORNE PRINTER PAPER FROM ASTRONOVA®

1 AstroNova knows printers

After over 40 years of designing and building thermal printers, we know how ruggedized airborne printer work. We know how to preserve and extend printhead life, resulting in long-term reliability. We know that each printer has different needs of use. Some printers use a top of form mark to sense paper position and start printing; so we provide high density, reliable queue marks on our paper. Some printers require perforations for ease of tearing off a page, so we have a range of perforating tools to suit every application as well. This is what we do - we know how to match paper to printer.

2 AstroNova knows thermal paper

Using a lesser quality paper can generate issues with your printheads and data. That's why we start with only the highest quality, FAA certified base paper with low friction to minimize printhead wear, in combination with very low concentrations of corrosive materials to prevent printhead corrosion and controlled moisture content & thickness; exacting thermal response and permanent imaging properties.

3 AstroNova paper has a longer shelf life

You don't have a need to worry about wasted inventory anymore. AstroNova's quality Airborne Printer Paper has a shelf life of three years (before imaging) and an archivability period (after printing) of seven years.

4 AstroNova paper is 100% BPA-free

Most thermal printer paper contains Bisphenol A (BPA), which recent studies reported federal health officials to be expressing concern about the safety of BPA. As a result, with your health in mind, AstroNova has made its entire line of airborne printer paper 100% BPA free.

5 AstroNova's sales team members are printer and paper experts

You have the unique pleasure of being assisted by our factory-trained printer and paper experts each time you place an order. Every AstroNova Sales Team member possesses extensive printer knowledge and can advise you on which papers will best suit your needs. With the help of a trained AstroNova specialist, we can help you will avoid costly purchasing errors.
