

# AstroNova Phenol-Free Flight Deck Printer Paper

## Keeping Aviation Safe

### OEM-Certified for AstroNova Printers

AstroNova's phenol-free thermal paper is engineered specifically for use in AstroNova flight deck printers. It contains no BPA, no BPS, and no phenol derivatives, creating a healthier flight deck environment. As the OEM for cockpit printers and paper, AstroNova certifies all of its products to meet exacting performance standards for legibility, sustainability and reliability. Compared with non certified paper, OEM-certified media helps maintain print quality while reducing long term wear on printer components.

01

### Prioritizing Pilot & Crew Safety

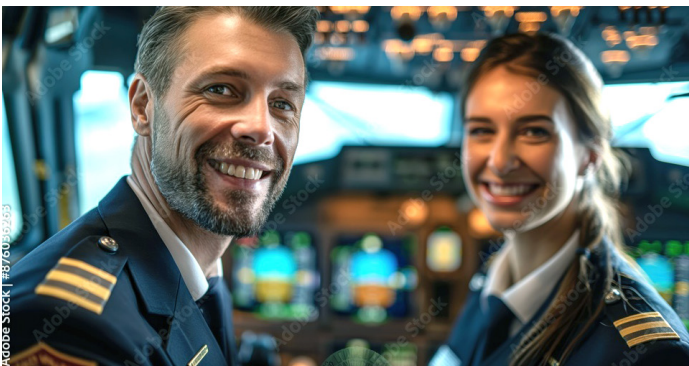

- Eliminates concerns about BPA and BPS exposure
- Supports a healthier operating environment for crews
- Reinforces airline safety and compliance initiatives
- Aligned with sound risk management practices

02

### Reduced Maintenance. Extended Equipment Life.

- Minimizes printhead wear
- Reduces service events and unscheduled maintenance
- Supports long-term equipment reliability
- Maintains OEM warranty integrity

03

### OEM-Certified

- Non-abrasive design extends printhead life
- Optimized formulation delivers sharp, high-contrast output
- Supports long-term printhead durability
- Reliable printing in demanding flight operational conditions

04

### Improved Sustainability Profile

- Free from phenol derivatives
- Improved recyclability compared to conventional thermal paper
- Supports airline ESG and environmental goals

**One System.  
One Standard.  
ONE CHOICE.**

Safer for pilots.  
Certified by the OEM.  
Engineered for aviation reliability.

05

### Clear, Reliable Print for Readability

- High image density and excellent contrast
- Consistent performance across wide operating temperature ranges
- Long-lasting legibility of operational records
